**5. Additional Information.** (Space will expand to fit your text.)

Primary cost sharing from EQIP and technical assistance from NRCS reduced the amount of TRM grant funding for this project. When the original TRM grant application was made in 2013, these were not available to the landowner.

**6. Summary of Project Challenges.** (Space will expand to fit your text.)

The project experienced some rain and wet conditions after the topsoil was scraped and initial site grading work was completed but had favorable weather through the remainder of construction. There was more topsoil than estimated and therefore some extra earthwork and the need for additional clay fill to be hauled in.
