5. Additional Information. (Space will expand to fit your text.)

The city-wide Water Quality Calculation Updates will provide direction for city staff when determining which projects should be considered next for installation to control TSS & phosphorus and which parts of the city should these water quality controls should be focused. The plans have not been presented to the city council yet, but will be in an upcoming council meeting this spring.

6. Summary of Project Challenges. (Space will expand to fit your text.)

This storm water plan has been revised to address the Rock River TMDL wasteload allocations that were included in the MS4 permit that was re-issued in May 2014. Differences in modeling approaches between previous storm water plans and the current effort to meet TMDL requirements were developed by DNR through a technical team during this grant period. The collaborative process to resolve the modeling issues of storm water systems in TMDL areas between DNR staff, municipal and consulting representatives was appreciated.
