Zebra mussels confirmed in Lake Monona, Dane County (WBIC 804600) in October 2016.

A single veliger was found in a tow collected near Olin Park by Ted Bier, UW-Madison Center for Limnology, on 8/8/2015.

During the week ending 10/07/2016, multiple people and agencies reported adult mussels on piers and buoys. Peter Jopke of Dane County submitted voucher specimens for size and age:

| Lake | WBIC | County | Station | Collector(s) | Date Sample was Collected | Verified as | Adult length (mm) | Age Estimate | Note |
|--------|--------|--------|----------------------|--------------|---------------------------------|--------------|-------------------------|--------------|---|
| Monona | 804600 | Dane | near Tonyawatha Park | Pete Jopke | 10/04/2016 | zebra mussel | 16 | : | 1Veliger in 2015, YOY, 1 year so reproducing population. |
| Monona | 804600 | Dane | near Tonyawatha Park | Pete Jopke | 10/04/2016 | zebra mussel | 15 | : | 1Also reports of adults in multiple locations, further supporting reproducing population. |
