

## Appendix A. Trout Stream Classification Checklist (revised 2/2016)

(This completed checklist should accompany any trout stream classification changes. Check the items as appropriate and attach comments if desired.)

Stream name:     Moen Creek     (if stream is known by another name please list both names with the more common name first)

County:     Dane     WBIC:     1252100    

Define the portion of the stream to be classified. Please provide both a written description and the coordinate locations of the upstream and downstream beginning and end points.

From the confluence with Elvers Creek upstream to the outlet of Stewart Park Lake.

This written description should reference permanent, unambiguous landmarks that would allow a person unfamiliar with the area to locate the points (e.g., dams, road crossings, stream confluences, county lines, section lines, township lines)

Please provide coordinate locations in one of three formats:

Longitude/Latitude (Degrees, Minutes, Seconds): 89° 41' 28.7" W , 44° 55' 14.0" N

Longitude/Latitude (Decimal Degrees): -89.691332, 44.920576

WTM91 (easting and northing in meters): 544361, 494173

Upstream point coordinates:     -89.7405, 43.0217    

Downstream point coordinates:     -89.7585, 43.0350    

Classification proposed     Class II    

Fish survey (including relative abundance, length distribution, and age structure) and habitat survey completed on water to be classified. Survey on file at     Fitchburg     (office location)

Fish team supervisor and district fisheries supervisor have approved the classification.

District Fisheries Supervisor

## **Appendix B. Trout Stream Classification Public Notice Template**

Pursuant to NR 1.02(7)(c), Wis. Adm. Code, the Department of Natural Resources gives public notice of the classification of 1.56 miles of Moen Creek, in Dane County as a Class 2 Trout water. From the confluence with Elvers Creek upstream to the outlet of Stewart Park Lake.

This classification is based upon a survey which indicates this portion of stream has multiple year classes of trout present and there is sufficient overwinter survival.

*"A Class II Trout Stream is a stream or portion thereof that contains a population of trout made up of one or more age groups, above the age one year, in sufficient numbers to indicate substantial survival from one year to the next, and may or may not have natural reproduction of trout occurring; however, stocking is necessary to fully utilize the available trout habitat or sustain the fishery."*

The Department shall waive any hearing requirement on this classification unless a written request for hearing is received before (insert date 30 days from mailing date). Requests should be sent to David Rowe, WDNR, 3911 Fish Hatchery Rd, Fitchburg WI 53711

Length Frequency Distribution.

Stocking History

Year	Species	Age class	Number stocked	Average Length
2011	RAINBOW TROUT	YEARLING	1,000	9.2
2006	RAINBOW TROUT	ADULT (BROODSTOCK)	17	15.15
2005	RAINBOW TROUT	ADULT (BROODSTOCK)	20	16.5

Map of proposed change. From the confluence with Elvers Creek upstream to the outlet of Stewart Park Lake.
