LANDOWNERS' INITIALS: <i>MM</i>	DATE INITIALED: <i>9/22/14</i>
------------------------------------	-----------------------------------

ADDENDA MAY BE ATTACHED TO THIS DOCUMENT TO RECORD SPECIAL CONDITIONS.

SECTION 2: AGREEMENT PROVISIONS

1. The landowner agrees:

- A. To complete operation and maintenance to maintain the function of the practice. This includes maintaining the rain garden according to Attachment B.
- B. To construct the rain garden consistent with the plan prepared or approved by the Long Lake P&R District (Lake District), during the installation period identified in Section 1B.
- C. To submit a series of photographs to the Lake District to show stages of construction.
- D. To maintain the project in good condition for a period of ten years following installation.
- E. To repay cost-sharing funds immediately, upon demand by the Lake District, if the practices are not properly installed or maintained to avoid water quality problems. Repayment of grant funds shall not be required if a practice(s) is rendered ineffective during the required maintenance period due to circumstances beyond the control of the landowner.
- F. To conduct all land management and pollutant management activities in accordance with Polk County ordinances.
- G. Not to discriminate against contractors because of age, race, religion, color, handicap, gender, physical condition, developmental disability, or national origin, in the performance of responsibilities under this agreement.
- H. The Lake District and the Department of Natural Resources shall have the right to inspect sites to verify practice installation, operation, and maintenance. Failure to allow inspection of sites shall result in the termination of this agreement and the requirement that all payments made by the Lake District pursuant to this agreement be repaid.
- I. To pay the landowner share of the cost share agreement.

Receipt of landowner share _____ date) _____ (Lake District Rep. initials)

2. The Long Lake Protection and Rehabilitation District agrees:

- A. To pay the cost of practice installation once installed according to approved design and upon receipt of invoice from the landscaper.
- B. To provide technical assistance for the design, construction, and installation of cost-shared practice(s) according to state standards and applicable county ordinances.
- C. To determine the eligibility and provide review and potential approval for any unanticipated changes in practice components and costs.
- D. To make payment(s) for services and practices related to a project on the land specified in Section 1B, pursuant to Section 3 agreement, in accordance with procedures established by the LAKE DISTRICT and DNR.
- E. To collect and retain copies of all documents as proof of final payment and make these copies available to DNR upon request. Documents may be in the form of an invoice marked "paid in full," or receipts and canceled checks.
- F. To retain all documents resulting from this agreement.

3. This agreement may be amended, by mutual written agreement of the parties, during and after the installation period, if the proposed changes will provide equal or greater control of water pollution or habitat benefits. This agreement and any amendments may be recorded at the Polk County Register of Deeds.

4. This agreement is void if, prior to installation, the Lake District determines that due to a material change in circumstances the proposed practices will not provide cost-effective water quality and/or habitat benefits.

EXHIBIT B. Operation and Maintenance Plan

Cost Share Agreement LL-008

Rain Garden Maintenance

- Weeding will be needed to maintain the appearance and to allow growth of desirable plants in the rain gardens. As the rain garden plants become established, remove by hand only those plants you are certain are weeds. Try to get out all the roots of the weedy plants. Weeds may not be a problem in the second season, depending on the variety and tenacity of weeds present. In the third year and beyond, weeding isolated patches might still be needed on occasion, and invasive species should always be removed. Re-mulching every 2-3 years will help to keep weeds down.
- Watering may be needed in between rain events as seedlings become established and later on during periods of drought.
- After each growing season, the stems and seed heads should be left for winter interest, wildlife cover, and bird food. Once spring arrives and new growth is 2 to 4 inches tall, cut all dead plant material back by hand and compost or dispose of as appropriate. Shrub growth may be pruned if desired. It might be necessary to fence shrubs to prevent deer browsing.
- The integrity and function of the rain gardens to collect and contain runoff from impervious areas must be maintained as it was designed.
