

Healthy Lakes Example Report

Take advantage of this Healthy Lakes reporting example for your projects. It can be used to keep properties and project details organized in one location and will make it easier when you request grant reimbursement. You may also use the reporting example to feature Healthy Lakes projects that aren't grant-funded but still worthy of promotion.

Page 1 is grant-specific and should be completed by the project coordinator. The following pages are property-specific and can be completed by individual property owners or the project coordinator. Photos and other feedback may be used for promotional purposes like newsletter articles and the website, but personal information won't be shared without permission.

Grant Number: LPT55917

Grant Sponsor: WI DNR

Were all projects completed as proposed?

☒ Yes

☐ No

If no, explain the reasons for the change: Enter explanation

Make sure you have completed the following requirements and keep them for your records, 10 years:

- ☐ A signed 10 year contract with each land owner
- ☐ Design specifications and location of each best practice

Optional: Tell us your story. We'd love to hear what worked, what didn't work, unique fish and wildlife observation, and your specific suggestions how we can improve Healthy Lakes.

Explain any challenges you may have experienced and potential solutions to those challenges

Healthy Lakes Example Report

Complete one per property owner.

Property Owner Name: Lac du Flambeau Tribe

Check the box for completed practice(s) and complete the required data deliverables

☐ **Fish Sticks:** Insert total number of completed fish sticks.

Number of Fish Sticks clusters installed: Number.

Total Number of trees: Number.

☒ **Native Planting: 1**

Bird/Butterfly

Surface Area: 350

Length of lakeshore restored: 350 square feet

☐ **Rain Garden:** Insert total number of rain gardens.

Dimensions: Number.

Drainage Area Captured: Number.

☐ **Diversion (Transitional or Upland):** Insert total number of diversions.

Drainage Area Diverted: Number.

Drainage Area Captured: Number. If uncertain: Choose an item.

☐ **Rock Infiltration:** Insert total number of rock infiltrations.

Dimensions: Number.

Drainage Area Captured: Number.

Helpful Photo Tips

Take photos from the same vantage point, at a similar time of day, with the sun at your back, if possible, and at the landscape scale. Avoid taking pictures at high noon. Photos provided may be used for promotional materials, Healthy Lakes website (healthylakeswi.com), and other outreach.

Before Pictures (at least 1)

Photo 1: 7/14/17, Before weeding and mulching-after stone path was laid

Photo 2: 7/14/17, Before all work including weeding, mulching, path

Photo 3: Enter date and description

During Pictures (optional)

Photo 4: 7/14/17, youth crew and staff weeding project site

Photo 5: 7/14/17, after weeding and initial mulching of site. No planting has occurred yet at project site.

Photo 6: 7/21/17, during planting-additional mulch went on that day

Healthy Lakes Example Report

After Pictures (at least 1)

Photo 7: 7/21/17, During planting, intern and community member planting together

Photo 8: 7/21/17 Final after photo of planting and mulching crew. This is the only after photo but would like to send an additional photo later in this growing season

Photo 9: Enter date and description

Summary of education activities and/or promotion of Healthy Lakes initiative

Examples include lake newsletter, local media, state media.

This project allowed for a variety of educational opportunities. We brought in our youth crew and interns to learn about the importance of restoring lakeshores and having restoration gardens. This project included a few smaller work days with our youth crew and staff in which we planned, weeded, and mulched the area that would be planted. This culminated to one big work day in which we partnered with UW Madison's Indigenous Science Camp for our work day. This actually began the day before planting where we used classroom time to learn about techniques and planting guidelines. The following day the whole team worked hard to carry out the planting. Overall this was an incredibly success and wonderful experience. The restoration phases 2 and 3 will be carried out this next year to complete the planting phases of the restoration garden. For the following years we will be weeding, mulching and tending to the garden to ensure its success.
