Thermal	Percent.Indiv.	Size	Percent.Indiv.	Tolerance	Percent.Indiv.
Coldwater	0.03	Small	0.75	Intolerant	0.03
Transitional	0.88	Medium	0.25	Intermediate	0.19
Warmwater	0.09	Large	0.00	Tolerant	0.78

## Warm Transition Headwater Guild Test

### Comments from WR Biologist:

Warm transition headwater is best fit and the recommended natural community. Streams in red clay plain have naturally occurring very low to zero base flow and high turbidity, which favors pioneer and tolerant fish species
