

HEALTHY LAKES PROJECT REPORT

LPT 52116

BONE LAKE MANAGEMENT DISTRICT

Were all projects completed as proposed?

No. Of owners who originally pledged to complete projects under the Healthy Lakes program, only 3 are included in this reimbursement request. Four others with original pledges completed projects under another Lake Protection Grant. The remainder decided to not participate, and the District found other volunteers.

Make sure you have completed the following requirements and keep them for your records, 10 years:

- A signed 10 year contract with each land owner
- Design specifications and location of each best practice

Richard Ihrig – Native Planting – Woodland Design – 900 ft² – 45 feet of lakeshore

Paul Kuhnmuench – Native Planting- Prairie – 350 ft² – 35 feet at lakeshore

BEFORE: 08/17/2018

AFTER: 10/10/2018

Promotion

The Bone Lake Management District promoted participation in the Healthy Lakes Program through newsletters (Fall 2015 – article and pledge postcard, Spring 2016, Fall 2016, Fall 2017, Spring 2018). Newsletters are available to view on the Bone Lake website: bonelakewi.com.

A demonstration at the Bone Lake North Landing includes a 300 ft² native planting, hillside native plantings, a rock infiltration trench, trench diversion, and a rain garden. Signs explain the practices.

Occasional email blasts encourage participation in Healthy Lakes and other runoff mitigation practices.

The Waterfront Runoff Mitigation committee members encourage their friends and neighbors to participate by sending letters and contacting them directly.
