15	3.0	
16	3.0	
17	2.5	3.5*

* Secchi disk was on lake bottom

Secchi measurement on 0902 at standard site #11 found only 0.75 ft due to strong, bright green algal growth in water column. By 0905 the visible green algal growth decreased and Secchi depth had increased, but was still less than "normal". By 0910 the Secchi depth measurements were more consistently back to "normal".
