Center Point Latitude (N)	44	28	24	<input type="checkbox"/> GPS <input type="checkbox"/> DNR WebView or Surface Water Data Viewer <input checked="" type="checkbox"/> Other (specify): Converted Brown County Mapping Coordinate To A Geographic Coordinate System WGS-84
Center Point Longitude (W)	88	01	31	

**C. Project Summary and Description**

UNPS&SW Grant Project Name  
**2008 Storm Water Planning**

**Project Information (continued)**

The Village of Allouez is required by the EPA and State of Wisconsin to obtain an NR 216 Municipal Storm Water Discharge Permit. The UNPS&SW Planning Grant will assist the Village with NR 216 Municipal Permit compliance and long-term non-point source pollution reduction. The proposed planning activities will provide the Village with the tools necessary to protect the designated and beneficial uses of the Fox River, East River, and other environmentally sensitive areas. The Village recognizes the ecological, recreational, and economic benefits provided by these natural resource features.

The primary objective of the proposed planning activities is to revise the existing storm water management plan, revise existing ordinances and provide additional ordinances, programs and policies intended to meet current NR 216 permit compliance. The current storm water management plan and ordinances were developed, approved and adopted prior to the adoption of NR 151 and changes to NR 216. In addition, the plan was based on all old version of SLAMM which does not exist currently. The Village needs to remodel the community using the new SLAMM model to determine compliance with the 20% / 40% permit requirements. The primary goal of the plan is to reduce non-point source pollution (TSS and phosphorus), reduce potential for stream erosion, reduce potential for habitat degradation, conserve valuable natural resource features and protect the East River and Fox River, as well as other environmentally sensitive areas.

The Village of Allouez plans to reduce non-point pollution and satisfy the above goals and objectives by conducting various planning activities. Specifically the Village plans to revise, update or develop their SLAMM modeling, erosion control ordinance, procedures for erosion control inspection and enforcement, storm water management ordinance, procedures to ensure long-term BMP maintenance, illicit discharge ordinance, illicit discharge response procedures, dedicated revenue sources, public education and outreach plan, public involvement and participation strategies, municipal pollution prevention plan, municipal separate storm sewer system (MS4) map, storm water quality management plan for developed urban areas, and measurable goals.

**D. Watershed and Waterbody (see Attachment A)**

Watershed Name	Township Name (for respective Town/Range/ Section, listed above)	Watershed Code (for respective Town/Range/ Section, listed above)	% of Project Area (for respective Town/Range/ Section, listed above)	Primary Waterbody (for respective Town/Range/Section, listed above)
East River	23N, 20E	LF01	100%	Fox River / East River
			%	
			%	
			%	
			%	

Note: The planning project area can include more than one watershed. Do not submit separate applications for the same activity in each watershed.

**Part I. Screening Requirements**

**Yes No A. Map**

An 8.5" x 11" topographic map from USGS or the DNR viewers, showing the project area, is attached.

**B. Planning Activities For Which DNR Funding Is Requested (check all that apply)**

- Storm water management planning (including plans for new and/or existing development).
- Ordinance development and administration (including construction site erosion control and/or storm water management).
- Evaluation and/or establishment of local financing options (such as storm water utilities).
- Public education and outreach.

Other (specify):

(see **Attachment D** for additional planning activity information)

**Yes No C. Filters**

Note: You must be able to answer "Yes" to each of the following to be eligible for a grant.

- 1. Project is in an area that is urban or will be urban within 20 years. (see **Attachment B**)
- 2. Project will be completed within 24 months of the start of the grant period.
- 3. Staff and consultants designated to work on this project have adequate training, knowledge, and experience to implement the proposed project.
- 4. Staff or contractual services, in addition to those funded by this grant, will be provided if needed.
- 5. Planning products prepared under this grant will not work at cross-purposes to (are consistent with) non-agricultural performance standards under ch. NR 151. (see **Attachment E**)
- 6. The local DNR Regional Nonpoint Source Coordinator (see **Attachment C**) has been contacted about this project.

Name of the Regional Nonpoint Source Coordinator contacted	Date contacted	Subject of contact
Dick Sachs	04-09-07	Discussed content of the plan work items.

- 7. Can you declare that at least one of the two statements below is TRUE?  
 Statement A. The grant application is for a local governmental unit that does have jurisdiction over the project area. (Jurisdiction over the project area means that the governmental unit has control over whether the planning recommendations are carried out.)  
 Statement B. The applicant does not have jurisdiction over the project area. The applicant is required to obtain a permit under subchapter I of ch. NR 216. Attached to this application is an intergovernmental agreement that meets the requirements of **Attachment H**.
- 8. Can you declare that at least one of the two statements below is TRUE?  
 Statement A. The applicant is not the University of Wisconsin Board of Regents.  
 Statement B. The applicant is the University of Wisconsin Board of Regents **and** the project will develop recommendations for a UW Campus area located in a municipality that meets **both** of the following criteria:
  - The municipality is required to obtain a municipal storm water permit under ch. NR 216;
  - The municipality is located either in a priority watershed or lake area identified under s. 281.65, Wis. Stats., or in an area of concern as identified by the International Joint Commission under the Great Lakes Water Quality Agreement.

**If the governmental unit answered "No" to any of the items in Question C. above, stop here. This project is ineligible.**

**Part II. Minimum Qualifications**

**Question 1. Fiscal Accountability**

**A. Timeline and Source of Staff**

For each applicable milestone listed below, fill in the appropriate data:

Milestone	Target Completion Date (month/year)	Source of Staff
Prepare preliminary scope of services and discuss with DNR NPS Coordinator	04/07	Village Staff, DNR NPS Coord., McMahon
Prepare Request for Proposal	04/07	Village Staff, DNR NPS Coord.
Select Consultant		
Finalize Scope of Service and Professional Services Contract	05/07	Village Staff, DNR NPS Coord.
Get DNR Approval of Professional Services Contract	05/07	Village Staff, DNR NPS Coord.
Hold "kick-off" meeting	09/07	Village Staff, DNR NPS, McMahon
Additional Milestones: (list below)		
Interim Meeting with DNR	01/08	Village Staff, DNR NPS Coord., McMahon
Presentation to Municipal Council	09/08	Village Staff, DNR NPS Coord, McMahon
<b>Submit public education and outreach program</b>	05/08	Village Staff, McMahon
<b>Submit public involvement and participation program.</b>	05/08	Village Staff, McMahon
<b>Submit illicit discharge ordinance.</b>	09/08	Village Staff, McMahon
<b>Submit illicit discharge response procedures.</b>	09/08	Village Staff, McMahon
<b>Complete initial field screening.</b>	09/09	Village Staff, McMahon
<b>Submit on-going field screening.</b>	05/08	Village Staff, McMahon
<b>Submit construction site pollutant control ordinance.</b>	05/08	Village Staff, McMahon
<b>Submit construction site inspection and enforcement procedures.</b>	05/08	Village Staff, McMahon
<b>Submit post-construction storm water management ordinance.</b>	05/08	Village Staff, McMahon
<b>Submit long-term maintenance procedures.</b>	09/08	Village Staff, McMahon
<b>Submit pollution prevention program</b>	09/08	Village Staff, McMahon
<b>Submit evaluation of flood control structures.</b>	09/08	Village Staff, McMahon
<b>Submit assessment of compliance.</b>	09/08	Village Staff, McMahon
<b>Submit MS4 Map.</b>	09/08	Village Staff, McMahon
Submit project and final report to DNR	10/08	McMahon

UNPS&SW Planning Program Grant Application –  
CY 2008 Funding

Form 8700-299A (R 1/07)

Page 10 of 18

UNPS&SW Grant Project Name  
2008 Storm Water Planning

Project Information (continued)

**B. Adequate Financial Budget**

Provide the following information for the project.

The state share may not exceed 70% of eligible costs. The grant amount is capped at \$85,000 for the eligible planning activities.

FINANCIAL BUDGET TABLE – PLANNING ACTIVITIES

A Project Activity for which DNR Funding is Requested	B Estimated Total Cost (\$)	C Amount from Column B Eligible for DNR Cost Sharing (\$)
Inventory & Map (basins, watersheds, drainage areas, rivers, streams, wetlands, 303(d) impaired waters, threatened / endangered, historical, soils, bridges, culverts, storm sewers, ditches, flow patters, outfalls, BMP's, land use, WPDES permits, public property, municipal facilities, streets).	3,000	\$3,000
Public Education & Outreach Plan per NR 216.07(1). Educate citizen group, facilitate discussion and rank education priorities.	3,500	\$3,500
Public Involvement & Participation Plan per NR 216.07(2). Facilitate citizen group discussion and rank education priorities.	3,500	\$3,500
Illicit Discharge Detection & Elimination per NR 216.07(3) - (Ordinance and illicit discharge response procedures.)	\$5,000	\$5,000
Construction Site Pollutant Control per NR 216.07(4) - (Ordinance and procedures for plan review, permit issuance, site inspections, enforcement, and information from the public.)	\$4,000	\$4,000
Post-Construction Storm Water Management per NR 216.07(5) - (Ordinance and procedures for plan review, permit issuance, tracking long-term BMP maintenance, enforcement.)	\$3,000	\$3,000
Pollution Prevention per NR 216.07(6) - (Routine BMP inspection, street sweeping, catch basin cleaning, deicers, leaf/grass clippings, planning for municipal garages, fertilizers.)	\$8,000	\$8,000
Storm Water Quality Management per NR 216.07(6) - SLAMM	\$10,000	\$10,000
Structural / Nonn-Structural Alternatives - SLAMM	\$12,000	\$12,000
Municipal Separate Storm Sewer System Map per NR 216.07(7).	\$3,000	\$3,000
Dedicated Revenue Sources. Review and Revise Current Polices, Procedures, Rates, and Credit Structure, etc.	\$2,000	\$2,000
Prepare Final Report / Storm Water Management Plan	\$5,000	\$5,000
Develop Measurable Goals for NR 216 Municipal Permit	3,000	\$3,000
1. Total	\$65,000	\$65,000

UNPS&SW Grant Project Name  
2008 Storm Water Planning

**Project Information (continued)**

**Cost-Sharing Worksheet**

**Eligible Costs:**

2. 70% of column C, Total (1) above	\$45,500
Cap Test:	
3. Maximum State Share [Lesser of (2) or \$85,000]	\$45,500
State & Local Share:	
4. Requested State-Share Amount (=Requested Grant Amount)	\$45,500
5. Local-Share Amount [Total (1), column B less (4)]	\$19,500

Describe the Quality of Cost Estimates (in your description, discuss whether the cost estimate is based on a competitive bid, scope of services, similar projects conducted locally, similar projects conducted elsewhere in the state or region, or other more generalized data):

Village Staff and McMahon Associates, Inc. met to discuss the proposed planning activities. We discussed existing Village Staff availability and the amount of external support needed. Based on previous experiences in Allouez, we estimated the number of meetings likely required to provide adequate guidance for the Village. We estimated the number of hours required for qualified staff to perform specific tasks. Estimates were based on the Village's goals, uniqueness, and information availability. Cost estimates were verified for reasonableness based upon similar projects completed in the past few years.

**Question 2. Project Evaluation Strategy**

- Yes No Information that will be developed and presented to DNR to evaluate the environmental benefits of completing this project. (check all that apply)
- A. Information that quantifies how project implementation is projected to decrease storm water impacts on state waters will be provided to DNR. The information may be provided as part of the planning product (e.g., storm water plan, I&E plan) or in the Final Report.
- B. Tracking
1. Information that tracks progress in carrying out recommendations of this project will be provided to the Department for one (1) to two (2) years after the project is completed.
2. Specify the number of years that tracking information will be provided, and describe in concept how this annual post-project tracking process will work:

Submit annual reports to the DNR for 2-years. The reports will summarize the status of program implementation through its measurable goals. The Village is required to develop measurable goals and track implementation of its storm water program as part of its NR 216 Municipal Permit.

**Question 3. Evidence of Local Support**

- Yes No The level of local support that currently exists for the proposed project.
- A. **Government**
1. The local-share funds for the project expenses are already included specifically in an adopted budget.
- OR
2. The local-share funds for the project expenses are or will be included in a proposed budget.
- B. **Community**
1. There is community support specifically for the project in this application, and evidence of this support is included with the application submittal.

UNPS&SW Grant Project Name  
2008 Storm Water Planning

Project Information (continued)

OR

2. There is community support for addressing general water resource needs in the community, even though there may not be evidence of support for this specific project.

Question 4. Basin Priorities (check one)

- A. Clean Water Act s. 303(d) List**  
Project with water quality goals directly dealing with a water body (lake or stream) on the latest Clean Water Act (CWA) s. 303(d) List of Impaired Waters, where the cause of the impairment in nonpoint source pollution and the project will reduce the type of nonpoint pollutants for which the water is listed.
- B. Outstanding and Exceptional Resource Waters**  
Waterbody is included in s. NR 102.10 (Outstanding Resource Waters) and/or s. NR 102.11 (Exceptional Resource Waters).
- C. NPS Rankings**  
Project is located in a large-scale watershed, a small-scale watershed, lake watershed, or other area ranked high or medium on the NPS Rankings List, where the goals of the project are directly associated with the reason for the ranking on the NPS Rankings List.
- D. Amendment of the NPS Rankings List Using State of the Basin Reports**  
Project is located within a watershed ranked low or not ranked on the NPS Rankings List, but information in a DNR State of the Basin report indicates a need to amend the NPS Rankings List because the stream or stream segment or lake is being affected by nonpoint sources of pollution.
- E. Amendment of the NPS Rankings List Using Other Data Sources**  
Project is located within a watershed ranked low or not ranked on the NPS Rankings List, but adequate data exists to request a ranking of high or medium for a waterbody that is being affected by nonpoint sources of pollution.
- F. Sources of Information for Areas Not Included in State of the Basin Reports**  
For some border waters, there is no State of the Basin report (i.e., along the Mississippi River or the Great Lakes). For these situations, another governmental document, accepted by the Regional NPS Coordinator, can be used to classify the resource as having a significant nonpoint source pollution impairment.
- G. Not Included in Other Categories Above**  
50% or more of the planning area is not included in the categories above (A-F).

**Part III. Competitive Elements**

**Question 5. Water Quality Needs**

For each watershed in the project area, identify the category that best identifies the project goals. If more than one category is checked (because the project area contains more than one watershed), estimate the portion of the project area to be assigned to each category.

Note: For border waters where a State of the Basin Report does not exist, another governmental document acceptable to the Regional Nonpoint Source Coordinator may be used to identify the water quality need.

- | Percent of Project Area             | Surface Water Considerations   |
|-------------------------------------|--|
| <input checked="" type="checkbox"/> | <b>A. 303(d) Listed Waterbody</b><br>Project with water quality goals directly dealing with a water body (lake or stream) on the latest Clean Water Act (CWA) s. 303(d) List of Impaired Waters, where the cause of the impairment in nonpoint source pollution and the project will reduce the type of nonpoint pollutants for which the water is listed. |
| <input type="checkbox"/>            | <b>B. Not Fully Meeting Uses</b><br>A waterbody (lake or stream) identified in a DNR State of the Basin report as not meeting or partially meeting designated uses due to nonpoint sources, but is not on the 303(d) List.   |
| <input type="checkbox"/>            | <b>C. Threatened Waterbody</b><br>A waterbody (lake or stream) viewed as "threatened" by nonpoint sources in a DNR State of the Basin report.  |
| <input type="checkbox"/>            | <b>D. Outstanding or Exceptional Resource Waters</b><br>Prevention of degradation due to nonpoint sources of outstanding or exceptional resource waters or high quality, recreationally significant waters, but not including waters listed as "threatened."   |
| <input type="checkbox"/>            | <b>E. Surface Water Quality</b><br>Prevention of degradation of surface water quality due to nonpoint sources. Waters in this category are neither high quality, recreationally significant waters nor "threatened" waters.  |
| <b>Groundwater Considerations*</b>  |  |
| <input type="checkbox"/>            | <b>F. Exceeds Groundwater Enforcement Standard</b><br>Groundwater within the project area where representative information indicates that stormwater pollutants in groundwater exceed the Enforcement Standard (ES).   |
| <input type="checkbox"/>            | <b>G. Groundwater Quality (see Attachment G)</b><br>The project area is within a geological area defined in Attachment G as susceptible to groundwater contamination.  |
| <input type="checkbox"/>            | <b>H. Exceeds Groundwater Preventive Action Limit</b><br>Groundwater within the project area where representative information indicates that stormwater pollutants in groundwater exceed the Preventative Action Limit (PAL).  |

\*Consult the Regional Drinking Water and Groundwater Specialist or the County Extension office.

**Bonus Points (see Attachment F):**

- | Yes                      | No                                  |   |
|--------------------------|-------------------------------------|---|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Water quality goals relate to the control of nonpoint source contaminants in public drinking water supplies.        |
|                          | 1.                                  | If yes, and the source of drinking water affected by the project area is <u>groundwater</u> , the project protects: |
| <input type="checkbox"/> |                                     | a. One wellhead   |
|                          |                                     | OR  |
| <input type="checkbox"/> |                                     | b. More than one wellhead   |

2. If yes, and the source of drinking water affected by the project area is surface water, check the source water assessment area in which the project is located. If more than one assessment area is checked (because the project area contains more than one watershed), estimate the portion of the project area to be assigned to each category.

<u>Source Water Drainage Area</u>	<u>Portion of Project in Assessment Area (%)</u>

<input type="checkbox"/> Milwaukee River	
<input type="checkbox"/> Sauk Creek	
<input type="checkbox"/> Sheboygan & Onion Rivers	
<input type="checkbox"/> Manitowoc River	
<input type="checkbox"/> Twin Rivers	
<input type="checkbox"/> Kewaunee & Ahnapee Rivers	
<input type="checkbox"/> Menominee River	
<input type="checkbox"/> Fish Creek	
<input type="checkbox"/> St. Louis & Nemadji Rivers	
<input type="checkbox"/> Lake Winnebago	

**Question 6. Extent of Pollutant Control**

A project can consist of one or more of the following parts (A-F). For each part below, check the boxes that describe work products that will be produced under this grant. Do not check boxes based on prior work.

**A. Ordinances**

The project will develop or complete one or more of the following ordinances, including associated information, education and public participation activities. (check all that apply)

- 1. Construction erosion control ordinance including all the requirements of s. NR 151.11.
- 2. Storm water ordinance for new development and re-development including all the requirements of s. NR 151.12.
- 3. Low impact development/conservation subdivision ordinances.
- 4. Other ordinances such as an illicit discharge ordinance, storm water ordinances affecting runoff from developed urban areas (e.g., pet waste management ordinances, nutrient management ordinances), or ordinances that regulate the application of fertilizers to non-municipal properties in accordance with NR 151.14

**B. Financing Mechanisms**

The project will evaluate financing mechanisms for storm water management, including associated information, education and public participation activities. Recommendations will be presented to the governing board for approval and DNR will be notified of the governing board's action. (check one of the following)

- 1. The project develops a dedicated revenue source, such as a storm water utility, to implement a storm water program focusing on implementation of performance standards in Subchapter III of ch. NR 151.  
OR
- 2. The project is a general feasibility analysis of alternative funding mechanisms.

**C. Storm Water Plan for Developed Urban Areas**

The project will develop a storm water management plan for developed urban areas that addresses all of the performance standards under s. NR 151.13 including associated information, education and public participation activities. (check one of the following)

- 1. This project will cover the entire geographic area of the governmental unit.  
OR
- 2. This project will cover only part of the geographic area of the governmental unit.

**D. Storm Water Plan for New or Redevelopment**

UNPS&SW Grant Project Name <b>2008 Storm Water Planning</b>
--

**Project Information (continued)**

The project will develop a storm water management plan for new development and re-development that addresses all of the performance standards under s. NR 151.12 including associated information, education and public participation activities. (check one of the following)

- 1. This project will cover the entire geographic area of the governmental unit.  
OR
- 2. This project will cover only part of the geographic area of the governmental unit.

**E. Information & Education Program**

The project will develop and/or implement an information and education program. (This does not include the information and education activities required as part of project under A. through D., above.)

**F. Inter-Municipal Cooperation (bonus)**

This project is being conducted as part of an inter-governmental storm water management strategy for a common water resource. Describe the inter-governmental effort that will be used to complete the project. If more than one local unit of government is joining in this project application, (a "joint application"), then an inter-governmental agreement meeting the requirements of **Attachment H**. must be submitted with this application.

**Question 7. Consistency with Resource Management Plans**

Yes No

**A. Consistency with Resource Management Plans**

The project implements a water quality recommendation specifically included in a locally approved resource management plan.

**B. Summarize the water quality recommendation from the local plan. Cite the name and date(s) of publication of the document.**

1. A construction site erosion control ordinance consistent with the performance standards of s. NR 151.11.

The Village of Allouez Public Works Director has the authority to require that the performance standards of NR 151.11 can and will be met for any land disturbing activity of any size within the Village. This Ordinance was adopted March 21, 2001

2. A storm water management ordinance consistent with the performance standards of s. NR 151.12.

The Village of Allouez post construction ordinance adopted March 21, 2001 meets or exceeds the requirements of NR 151.12. The ordinance was also written giving the Public Works Director the power to place any requirement on a project which would include NR 151.12 compliance.

**Question 8. Use of Additional Funding**

Yes No

Funding requested is below the 70% cost-share rate and below the \$85,000 cap.

**Question 9. City of Racine**

Yes No

This is an application from the City of Racine for a project that is necessary for the city to comply with state storm water permitting requirements.

**Part IV. Eligibility for Multipliers**

Completion of this part of the application is optional. However, an applicant can increase the final project score by qualifying for a project multiplier.

**Local Implementation Program** (select all that are in place as of the application submittal date)

Yes No NA

**UNPS&SW Planning Program Grant Application –  
CY 2008 Funding**

Form 8700-299A (R 1/07)

Page 12 of 18

UNPS&SW Grant Project Name  
**2008 Storm Water Planning**

**Project Information (continued)**

- A. The governmental unit is implementing a pollution prevention information and education program targeted for property owners and other residents.
- B. The governmental unit is implementing a nutrient management plan for municipally owned properties of at least five (5) acres of pervious area where nutrients are applied.
- C. The governmental unit is tracking storm water permitting activity (construction and post-construction) in the governmental unit and can make summary information available to the DNR upon request.

### Optional Additional Information

Carefully review the answers to all of the questions above. Is there additional information that will add to the understanding of this project? If so, describe here.

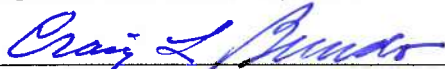

### Applicant Certification

An Authorized Representative must sign and date the application form prior to submittal to the DNR. All **four (4)** copies must include the signature of the Authorized Representative.

I certify that, to the best of my knowledge, the information contained in this application and attachments is correct and true.

Signature of Authorized Representative

Date Signed

4-11-07

RE: Storm Water Planning Grant Application  
Village of Allouez Storm Water Utility

Dear Ms. Thompson;

The Village of Allouez Storm Water Utility is submitting a Financial Assistance Application to the Department of Natural Resources for storm water planning for the Village of Allouez. The primary purpose of the planning effort is to further develop the storm water plan for compliance with the 2013 treatment requirements.

On behalf of the Public Works Committee of the Village of Allouez, we firmly support this application for financial assistance and support the Village efforts to complete this planning effort and update and finalize the Village storm water plan to obtain compliance with the 2013 requirements. Please accept this letter in support of this application.

Allouez intends to complete its evaluation and development of all requirements, permits, ordinances and treatment systems to accomplish this goal. Please note that one of the key objectives of this planning effort is to identify and select treatment methods for the storm water discharges to the Fox River. Previous work to date by Allouez has focused on the treatment needs for discharges to the East River, and providing treatment in several locations on the East River. This effort will be expanded to the Fox River in this planning work.

Please feel free to contact Allouez should you have any questions or desire further information.

Sincerely,

A handwritten signature in cursive script that reads "Susan Foxworthy".

Susan Foxworthy  
Administrator  
Village of Allouez

**Subject:** Pond Funding at Bethel Baptist Church

Craig -  
Bethel Baptist Church supports the Village of Allouez funding application for the stormwater planning funding application. We understand the benefit to Bethel is that this will assist the Village in providing storm water treatment for Bethel, whether a detention pond or other more local system just for Bethel is constructed.

Please call me anytime with any questions regarding this issue.

- Question 7. Consistency with Resource Management Plans  
B. Summarize the water quality recommendation from the local plan.  
Cite the name and date(s) of publication of the document.

The Village of Allouez Storm Water Management Plan adopted March 21, 2000 reflects the goals and strategies of the East River priority watershed plan. The goal of the Village's plan matches the goal of the East River priority watershed plan reducing TSS to the East River by 50% and the Fox River by 30%. The plan encourages the use of wet detention ponds, of which the Village currently has three regional ponds with planning for two more evaluated as a part of work proposed in this grant.

Optional Additional information

The Village of Allouez has budgeted funds for 2007 for evaluating end of pipe mechanical BMP's. The Village is currently working with Contech Storm Water Solutions and McMahon Associates, Inc. to select a site for the installation and performance evaluation of a mechanical BMP. The Village is evaluating this BMP for two primary reasons. The first reason is to determine the cost effectiveness and TSS removal benefit of these devices toward the 40% reduction goal. The other is to provide some treatment to the Fox River. Currently about 1/3 of the Village runoff water discharges to the Fox River with no treatment. Existing development along the Fox River and topography do not facilitate the possibility of wet detention ponds along outfalls. Sweeping is the only benefit provided for TSS removal of Fox River discharges. The Village is interested in the feasibility and cost to provide some level of treatment on all piped discharges to the Fox River. The Village of Allouez continues to be proactive in meeting the requirements of the Wisconsin DNR Storm Water Permit.
