Subject: lake class - Long Lake

Hi Dennis and Ashley,

Long Lake in Waushara County (wbic 1000800) is a seepage lake. The information from ROW pulled into the plant database is saying it is a spring lake (which is fine, it is groundwater fed). For assessment purposes, it should be a seepage lake (additional information to spring). Can you make sure it is seepage and not drainage in ROW and in anything that the assessment packages use? I'm not sure how to update the source of information, but we have worked extensively on that lake and there are not any inlets or outlets.

Thank you!  
Katie
