Warm Transition Headwater Guild Test

Comments from WR Biologist:

In the 2016 survey, too few fish were collected. However, I am Verifying the NC as Cool-Warm Transitional Headwater based on the following:

Fish survey conducted in 2013 (Survey Seq. No. 388995639) passed all but the Stream Size Guild, with Large Stream Size Guild species being present. This is expected, given the proximity to Lake Michigan.

A fish survey performed in 2005 (Survey Seq. No. 82259) upstream at 18th Street showed a NC of Cool-Warm Transition Headwaters.
