RE: 2023 Brown County Work Program Proposal for WDNR

Dear Ms. Howe:

Enclosed please find the Year 2023 Brown County Work Program Proposal for Areawide Water Quality Planning Projects. Under a cooperative agreement the Brown County Planning Commission (BCPC) will provide the services outlined in the work program for the Wisconsin Department of Natural Resources (WDNR) Areawide Water Quality Management Program in the 2023 calendar year. The program is itemized into three work elements, which are outlined in detail, and the funding request is summarized in Attachment A. BCPC anticipates a total project cost of \$57,659.48, of which BCPC would be eligible for \$43,244.61 (75.0 percent) from the WDNR. However, based on discussions with WDNR staff and available funds, Brown County is respectfully requesting **\$38,000.00 (66 percent)** and will match the requested WDNR funds with a \$19,659.48 (34 percent) match which includes materials, salary, and indirect expenditures as documented in Attachment A.

BCPC has enjoyed a cooperative relationship with the WDNR and wishes to continue implementing the Water Quality Management Program in 2023. If you have any questions pertaining to this proposal, please contact me at (920) 448-6488.

Thank you for your consideration in this matter.

Sincerely,

Devin Yoder
Senior Planner

Attachment: Areawide Water Quality Management Program

**Attachment A –
Brown County Planning Commission
Water Quality Management Planning Work Program
January 1, 2023 – December 31, 2023**

PROJECT DESCRIPTION

The Brown County Planning Commission (BCPC) is requesting funding under the 2023 Work Program. This proposal includes:

- 1) Areawide Water Quality Management Planning/Sewerage Planning,
- 2) Erosion Control Plan Review and Enforcement, and
- 3) Stormwater Management Plan Review and Enforcement.

A detailed breakdown of activities and tasks under each work element is included in this proposal.

PROJECT NEEDS

Work Element 1

Areawide Water Quality Management Planning/Sewerage Planning

Other Areawide Water Quality Management Tasks Under Work Element 1

As the designated management agency for sewer service area planning within Brown County, BCPC will continue to review all wastewater facilities plans, sanitary sewer extensions, large onsite systems, area wide water quality management plans, sewer service area amendments, and environmentally sensitive area amendments for conformance with the *2040 Brown County Urban Service Area Water Quality Plan* (title of the updated version of the plan; formerly the 2040 Brown County Sewage Plan) and other plans that pertain to Brown County. Special attention is given to the identification and protection of environmentally sensitive areas and to consistency of planning efforts with the Area Wide Water Quality Management Plan and other adopted local, regional, and state plans and regulatory programs.

BCPC continues to expand cooperation with various levels of government for water quality related projects. BCPC coordinates with the Army Corps of Engineers and the local branch of the Wisconsin Department of Natural Resources when the review or permitting of project sites requires approvals from these agencies. This effort provides property owners with a better understanding of regulations and how or where regulations may vary among agencies. This effort also leads to efficiencies in timing for the three agencies as information can be shared by the agencies, reducing the need for duplication of work and reviews. BCPC continues to facilitate the MS4 Permit for Brown County. Brown County roadside swales, ditches, drainage ways, and access points to waterways are tested annually for contamination.

BCPC reviews Chapter 30 Permits and Water Quality Certification permit applications to determine if the subject projects would have any adverse impacts upon environmentally sensitive areas and, ultimately, upon water quality within Brown County. BCPC will continue this review under the expectation that it can reduce the impact upon and the number of amendments to environmentally sensitive areas. Any concerns

should then be addressed earlier in the design and regulatory process and would be coordinated with other regulatory programs of the WDNR, leading to fewer issues later.

BCPC continues to consult on and review of all sewer service area and environmentally sensitive area amendment requests. BCPC also continues to prepare and transmit to the WDNR, via the SWIMS program, staff reports on all amendments requiring BCPC Board review to assist with the WDNR review and consideration, if required.

BCPC continues to provide educational and technical assistance to local units of government, developers, real estate agents, property owners, and the public regarding the identification, intent, and importance of environmentally sensitive areas and sanitary sewer service areas. Requests for assistance have increased significantly over the past few years and are envisioned to continue to increase due in part to the emphasis on local comprehensive planning, an uptick in development, job creation, and the continued protection of natural resources at the federal, state, county, and local levels.

BCPC proposes to assume 25 percent of the materials, salary, and indirect costs and expenses to implement the tasks outlined under Work Element 1.

Work Element 2

Erosion Control Plan Review and Enforcement

Facilitated by increased awareness of the need to control non-point source pollution, BCPC requires the development of an erosion control plan before approval of specified subdivision plats, certain certified survey maps, sanitary sewer service area amendments, environmentally sensitive area amendments, and sanitary sewer extension reviews. The erosion control requirements will be enforced under Brown County Code of Ordinances Chapter 21 (Land Division and Subdivision Ordinance) and the *2040 Brown County Urban Service Area Water Quality Plan*. BCPC's previous experience in enforcing erosion control requirements for sewer extensions and sewage plan amendments indicates that the educational element of controlling non-point source pollution is best achieved with in person contact and onsite working with developers and contractors alike from project planning to project completion. Brown County does have an adopted countywide construction site erosion control ordinance. Enforcement difficulties are primarily attributed to not having the use of countywide zoning, which requires the issuance of a building permit before construction begins. This issue is addressed by some municipality MS4 Permits and the Brown County MS4 Permit.

Benefits derived from implementing Work Element 2 include:

1. An increased educational effort directed toward; developers, engineers, building inspectors, and plan reviewers to implement proper erosion control practices.
2. Direct benefits in the form of less sediment entering adjacent wetlands, waterways, and drainage ways -- a benefit specific to various Priority Watershed Projects.
3. Direct benefit in locations that often generate the greatest sediment loads in urban areas (developing land).

BCPC proposes to assume 25 percent of the materials, salary, and indirect costs and expenses to implement the tasks outlined under Work Element 2.

Work Element 3

Storm Water Management Plan Review and Enforcement

With the need to control non-point source pollution, BCPC requires the development of a storm water management plan before approval of all subdivision plats, certain certified survey maps, sanitary sewer service area amendments, environmentally sensitive area amendments, and sanitary sewer extension reviews. The storm water management requirements will be enforced under Brown County Code of Ordinances Chapter 21 (Land Division and Subdivision Ordinance) and the Brown County Urban Service Area Water Quality Plan. BCPC's previous experience in enforcing storm water management requirements for sewer extensions and sewage plan amendments indicates that the educational element of controlling non-point source pollution is best achieved onsite working with developers and contractors alike from project planning to project completion. Brown County does not have an adopted countywide storm water management ordinance. This is primarily attributed to the difficulty of enforcing the program without the use of countywide zoning.

BCPC will continue to utilize the Land Division and Subdivision Ordinance and the 2040 Brown County Urban Service Area Water Quality Plan to emphasize storm water management throughout all projects.

Benefits derived from implementing Work Element 3 include:

1. An increased educational effort directed toward; developers, engineers, building inspectors, and plan reviewers to implement proper erosion control practices.
2. Direct benefits in the form of less sediment entering adjacent wetlands, waterways, and drainage ways -- a benefit specific to various Priority Watershed Projects.
3. Direct benefit in locations that often generate the greatest sediment loads in urban areas (developing land).

BCPC proposes to assume 25 percent of the materials, salary, and indirect costs and expenses to implement the tasks outlined under Work Element 3.

QUALIFIED LOCAL AGENCY

BCPC is the qualified local agency that will administer the activities within the proposal.

TIMETABLE

All activities proposed will be completed between January 1, 2023, and December 31, 2023.

ESTIMATED 2023 WORK PROGRAM COST

Estimated TOTAL Work Program Cost	\$60,042.32
Work Program Cost eligible WDNR Matched	\$45,031.74
WDNR Funding Available	\$38,000.00

It is understood that \$45,031.74 of the BCPC Work Program Costs qualifies for grant coverage; however, based on budget fluctuations, a total of **\$38,000.00 is available for Brown County Planning Commission in 2023**. This work program was written to represent all costs anticipated for the year 2023.

PROJECT IMPORTANCE

BCPC's involvement in the implementation of this proposal is critical to the success of water quality planning efforts at the local level. BCPC's role as an administrator of these activities at the local level encourages "grass roots" involvement that is vital to the success of any water quality management program, while at the same time, this involvement also provides a level of review, consistency, and oversight that often cannot be achieved at the state level due to a lack of coordination, access to information, or resources.

WORK ELEMENT 1

Areawide Water Quality Management Planning/Sewerage Planning: Hourly Breakdown

Item	Hours	Position	\$/Hour*	Cost
1. Wastewater Facility Plan Reviews	0.00	Planning Director	\$78.13	\$0.00
(Estimated # of reviews is 1).	5.00	Senior Planner	\$56.49	\$282.45
	0.25	Office Manager	\$44.50	\$11.13
2. Sanitary Sewer Extension Reviews	0.00	Planning Director	\$78.13	\$0.00
(Estimated # of reviews is 30).	30.00	Senior Planner	\$56.49	\$1,694.70
	7.5	Office Manager	\$44.50	\$333.75
3. Large Onsite System Reviews	0.00	Planning Director	\$78.13	\$0.00
(Estimated # of reviews is 0).	0.00	Senior Planner	\$56.49	\$0.00
	0.00	Office Manager	\$44.50	\$0.00
4. Area Wide Water Quality Management Reviews	0.00	Planning Director	\$78.13	\$0.00
(Estimated # of reviews is 0).	0.00	Senior Planner	\$56.49	\$0.00
	0.00	Office Manager	\$44.50	\$0.00
5. Sewer Service Area Amendment Reviews	0.00	Planning Director	\$78.13	\$0.00
(Estimated # of Reviews is 0 because of plan update).	0.00	Senior Planner	\$56.49	\$0.00
	0.00	Office Manager	\$44.50	0.00
6. Environmentally Sensitive Area Amendment Reviews.	0.00	Planning Director	\$78.13	\$0.00
(Estimated # of Reviews is 10).	20.00	Senior Planner	\$56.49	\$1,129.80
	0.00	Office Manager	\$44.50	\$0.00
7. Technical Assistance, Information, Website Update, and Education	15.00	Planning Director	\$78.13	\$1,171.95
(Estimated # of Reviews is 10).	620.00	Senior Planner	\$56.49	\$35,023.80
	0.00	Office Manager	\$44.50	\$0.00
PROJECTED EXPENSE TOTAL				\$39,647.58

WORK ELEMENT 1

Areawide Water Quality Management Planning/Sewerage Planning: Financial Summary

Staff	Hours	\$/Hour*	Total
Planning Director	15.00	\$78.13	\$1,171.95
Senior Planner	675.00	\$56.49	\$38,130.75
Office Manager	7.75	\$44.50	\$344.88
Subtotal			\$39,647.58

WORK ELEMENT 2

Erosion Control Plan Review and Enforcement: Hourly Breakdown

Item	Hours	Position	\$/Hour*	Cost
1. Subdivision Plat Reviews	25.00	Senior Planner	\$56.49	\$1,412.25
(Estimated # of reviews is 25).				
2. Certified Survey Map Reviews	36.00	Senior Planner	\$56.49	\$2,033.64
(Estimated # of reviews is 120).				
3. Sewer Service Area Amendments	0.00	Senior Planner	\$56.49	\$0.00
(Estimated # of reviews is 0 because of the plan update).				
4. Environmentally Sensitive Area Amendments (Est. # of reviews is 10).	10.00	Senior Planner	\$56.49	\$564.90
5. Sewer Extension Plan Reviews and Pre--Construction Conferences	6.00	Senior Planner	\$56.49	\$338.94
(Estimated # of Reviews is 30).				
6. Onsite erosion control inspections, education, and monitoring reports.	48.50	Senior Planner	\$56.49	\$2,739.77
PROJECTED EXPENSE TOTAL				\$7,089.50

WORK ELEMENT 2

Erosion Control Plan and Enforcement: Financial Summary

Staff	Hours	\$/Hour*	Total
Senior Planner	125.50	\$56.49	\$7,089.50
Subtotal			\$7,089.50

WORK ELEMENT 3

Stormwater Management Plan Review and Enforcement: Hourly Breakdown

Item	Hours	Position	\$/Hour*	Cost
1. Subdivision Plat Reviews	50.00	Senior Planner	\$56.49	\$2,824.50
(Estimated # of reviews is 25).				
2. Certified Survey Map Reviews	60.00	Senior Planner	\$56.49	\$3,389.40
(Estimated # of reviews is 120).				
3. Sewer Service Area Amendments	0.00	Senior Planner	\$56.49	\$0.00
(Estimated # of reviews is because of the plan update).				
4. Environmentally Sensitive Area	20.00	Senior Planner	\$56.49	\$1,129.80
Amendments (Est. # of reviews is 10).				
5. Sewer Extension Plan Reviews and Pre--Construction Conferences	6.00	Senior Planner	\$56.49	\$338.94
(Estimated # of Reviews is 30).				
6. Onsite erosion control inspections, education, and monitoring reports.	48.50	Senior Planner	\$56.49	\$2,739.77
PROJECTED EXPENSE TOTAL	184.5			\$10,422.41

WORK ELEMENT 3

Stormwater Management - Plan and Enforcement: Financial Summary

Staff	Hours	\$/Hour*	Total Cost
Senior Planner 2	184.5	\$56.49	\$10,422.41
SUBTOTAL			\$10,422.41

2023 WORK PROGRAM CONTRACT: PROPOSED FINAL COST

Work Element	Total Cost
Work Element 1 WQM/Sewerage Planning	\$39,647.58
Work Element 2 Erosion Control	\$5,317.12
Work Element 3 Stormwater Management	\$10,422.41
Materials	\$500.00
Brown County Cost	\$57,659.48
Eligible WDNR Match (75%)	\$43,244.61
WDNR Funding Available	\$38,000.00
