

Pictorial documentaion of starry stonewort (*Nitellopsis obtuse*) management efforts on Geneva Lake, Summer 2019-2020.

Searching for the location of the "deep water" population of starry stonewort, August 2019.

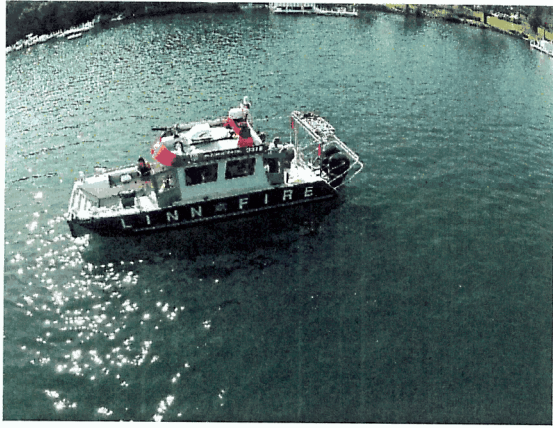

8/13/19. Under water remote operating vehicle (ROV) used to identify the extent and size of starry stonewort populations. The ROV is sitting on the gunnel of the Linn Fire and Rescue boat with the yellow cable coiled on the deck. Unfortunately, the water was turbid and underwater vision was limited.

8/13/19. The screen and control box of the ROV. Note monitor also used for a clearer picture for viewing.

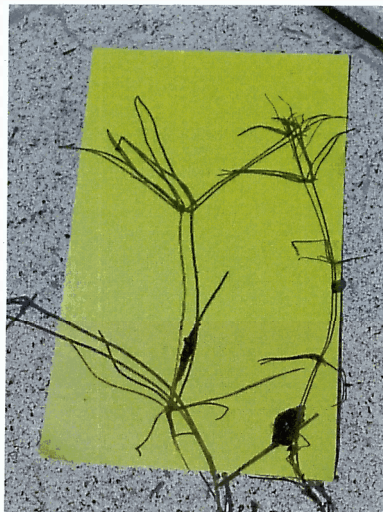

8/13/19. Viewing ROV video in search for starry stonewort while on the Linn Fire and Rescue Boat, Geneva Lake, WI .

6/13/19. Linn Fire and Rescue boat. Used for base of operations in search of starry stonewort populations and for the August 2019 hand pulling, Geneva Lake, WI.

8/13/19. Retrieving starry stoneworts specimens for the 'deep water' site on Geneva Lake WI.

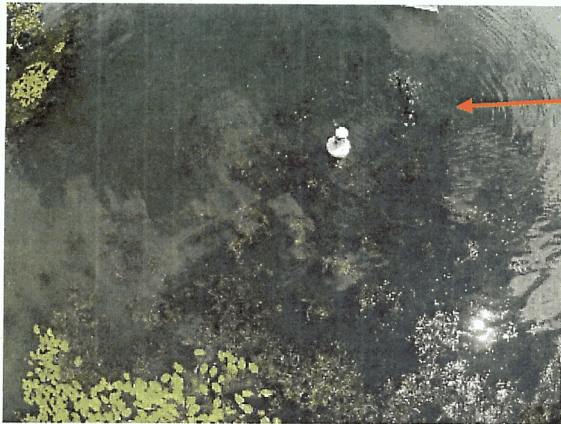

8/13/19. Starry stonewort (*Nitellopsis obtuse*) collected from the "deep water" site on Geneva Lake WI.

**Search for Starry stonewort in Trinke Lagoon, Geneva Lake WI August 2019.**

8/13/19. Snorkeling the surface waters of Trinke Lagoon, Geneva Lake, WI, searching for starry stonewort.

8/13/19. Aerial view of snorkeling for starry stonewort in Trinke Lagoon, Geneva Lake, WI.

Point-Intersect aquatic plant survey, Geneva Lake WI.

**Curtains and chemical treatment of Trinke Lagoon, Geneva Lake WI for starry stonewort 2019.**

6/19/19. Aerial view of the first bay in Trinke Lagoon, Geneva Lake, WI, a known location of starry stonewort. The picture is looking south from the lake. Note the curtain at the lagoon's outlet shown at the bottom of the picture. The second curtain is located under the bridge in the right of the picture.

6/18/19. Fully intact curtain between the first bay and the second bay of Trinke Lagoon, Geneva Lake, WI.

2019. Buoys in Trinke Lagoon, Geneva Lake WI. with changes for 2020.

Two of these on boat piers in Lagoon.

One of these in the lake at the mouth of the Lagoon.

Two of these in the Lagoon.

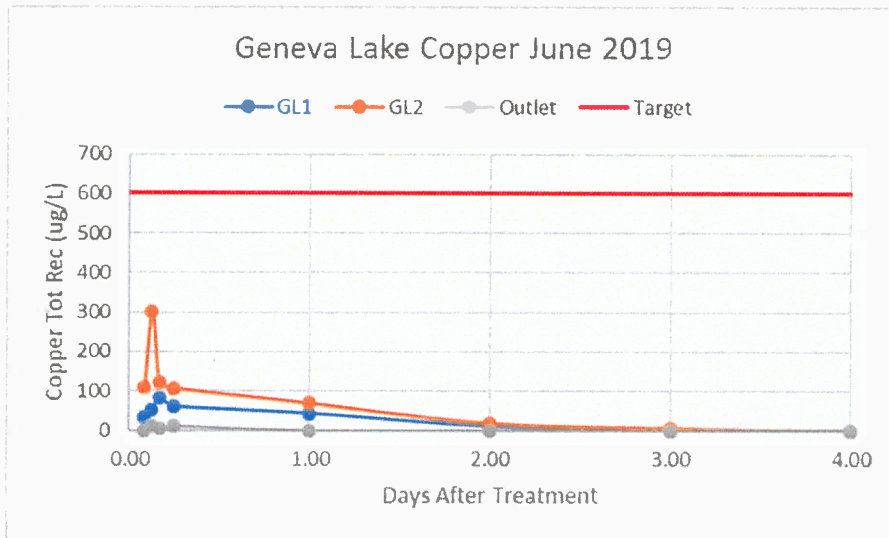

May 2020. Trinke Lagoon Geneva Lake, WI buoys with changed markings. Changes required as they will not be used to keep boaters out because of dredging, but used to warn boaters of SSW, per WDNR.

In 2020 the round hanging buoys were replaced on piers. The two identical floating buoys were placed at the mouth of the entrance to the lagoon. The single tall floating avoid buoy was placed in the center of the lagoon.

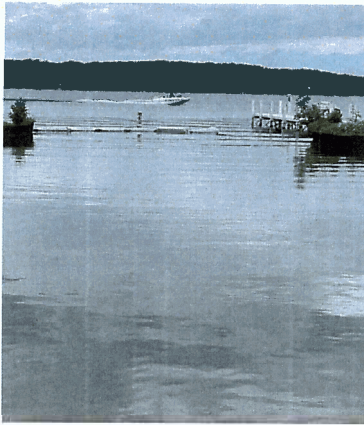

6/18/19. Chemical treatment of Trinke Lagoon Geneva Lake, WI for starry stonewort.

June 2019. Post application copper concentration in Trinke Lagoon, Geneva Lake WI. at different times after treatment.

**Vandalized Curtains. Trinke Lagoon, Geneva Lake WI.**

6/21/19. Vandalized curtain at the outlet of Trinke Lagoon, Geneva Lake, WI. It was reported that a jet skier ran through the curtain. Note the single buoy in lake just beyond the broken curtain.

6/21/19. Caribener with eyelet from curtain and plastic zip ties that were used to secure curtain, ripped out of curtains.

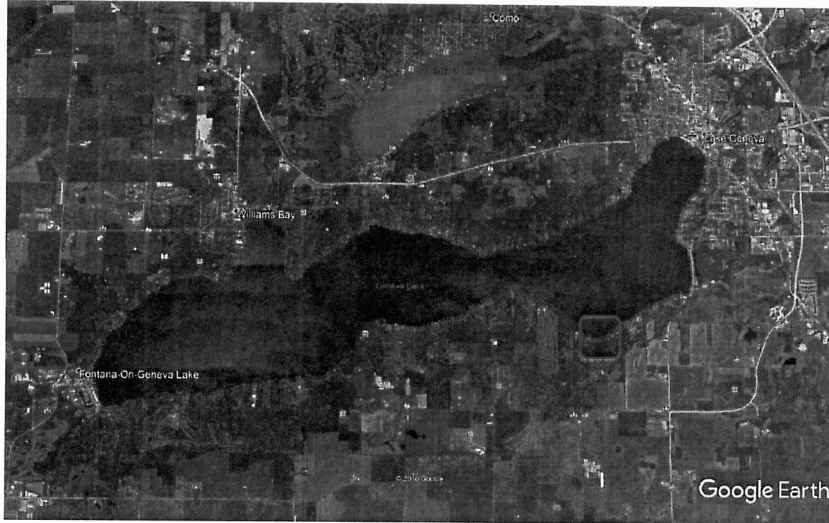

6/21/19. Broken curtain under bridge in Trinke Lagoon, Geneva Lake, WI.

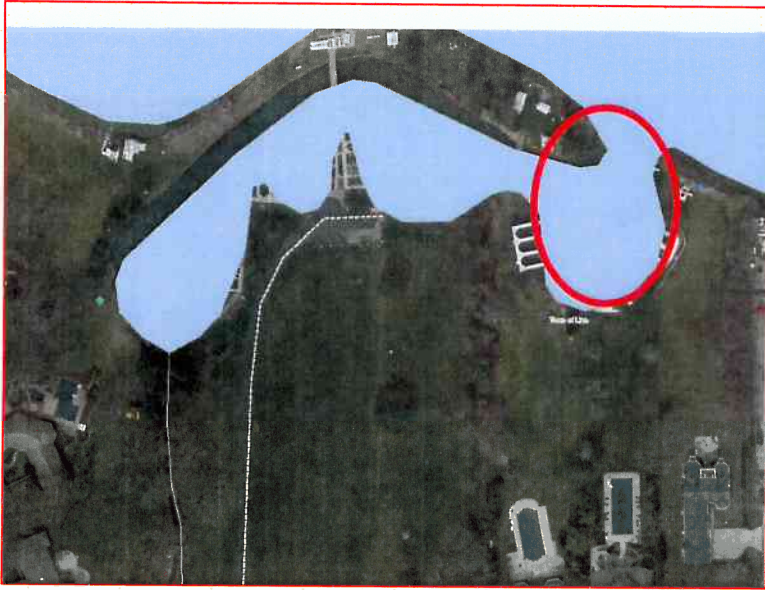

**Proposed dredging and dewatering sites, Trinke Lagoon, WI. Geneva Lake, WI.**

Location of Trinke Lagoon on Geneva Lake, WI.

Trinke Lagoon Geneva Lake, WI showing the dredge site, dewatering site, route of pmping hose from the dredge site to the dewatering site and route of return water to Trinke Creek. Geneva Lake is to the top of the picture.

Proposed area to be dredged, first bay, Trinke Lagoon, Geneva Lake, WI Geneva Lake is at the top of the picture.

Final proposed dewatering site for the Trinke Lagoon, Geneva Lake, WI dredging. It is platted as a never used town road. Looking west from Wildwood Dr. The site was to be graded, lined, and banked to allow for the catchment of water from the dewatering bags, into a small collection area from which the water would be released to the Trinke Creek, located to the right and back of the picture. A six-foot high secured fence would enclose the entire dewatering operation.

The air strip dewatering site, looking south. This area was initially proposed for dewatering. The lagoon is to the north approximately 20 ft. behind the spot from which the picture was taken.

**Hand Pulling of starry stonewort by BSA Venture Crew 519 and volunteers on Geneva Lake, WI August 5 - 6, 2020.**

8/5/20. BSA Venture Crew 519 preparing gear on the Linn Fire and Rescue Boat to dive on a starry stonewort bed for hand pulling. Note kayakers in the background ready to haul pulled starry stonewort to shore.

8/5/20. Kayakers prepare to bring dive bags of pulled starry stonewort from the dive site to the beach while instructions are being given by the dive team leader.

9/6/20. A kayaker bringing in a bag of pulled starry stonewort from the dive area on the lake in the background. Note the orange dive bag full of starry stonewort in the water behind the kayak. AS the kayakers came in to the beach area from the diver area, the dive bags would be removed and dumped into a wheel borrow and move to trailer for disposal at a compost site.

**Hand Pulling of starry stonewort by The Dive Guys on Geneva Lake, September 1-3, 2020.**

9/2/20. Dive Guys pulling starry stonewort from the "deep water" site and loading on the barge.

9/1/20. Dive Guys off loading pulled starry stonewort at Hillside Rd. Linn, Township, from barge to wheel burrows for transport to trailers

9/1/20. Dive Guys with loaded trailer and truck of starry stonewort, pulled from "deep water" site on Geneva Lake WI, ready to depart to a compost site.
