

## Summary Report

This report summarizes I-LIDS monitoring and review activity at the boat launch for 2025.

### I-LIDS Summary Data

Date Installed	7/10/25
Date De-installed	11/3/25
Videos Captured	3194
Videos Reviewed by ESP	1539
Total Videos Reviewed	1579
Launches counted	236
% of boat launch videos <sup>1</sup>	15%
Suspect AIS Violations	0
Hours of operation	5am - 10pm
Total hours of inspection time	1666 hours

**Observations:** People are curious about and aware of the camera, with many stopping to look, listen, and read the accompanying sign. Boaters are primarily seen checking, cleaning, and draining boats after retrievals. Inspectors are occasionally seen but not much interaction appears on camera. Boats from a few other states are launched into this lake. Many false positives occurred due to wind, sun, glare, and trees being identified as boat ID videos.

### Recommendations:

As with Butternut, explore solar solutions to reduced solar budget in fall. As we are offering an above-ground solution to housing foundations in 2026, we could move the location of the I-LIDS when necessary to a more optimal location for solar.

<sup>1</sup> The number of videos is always greater than the number of launches. If there is a magnetic sensor, it will trigger the camera to look for motion for 120 seconds. During this time, any activity (inspection, tie-downs, people moving, cloud movement, etc.) in front of the camera will trigger another video. Infrequently, the magnetic sensor may trigger randomly, or vehicle movement behind the sensor may set up the camera for additional video capture. If there's no magnetic sensor, the camera simply looks for sufficient motion and will capture a video.
