

STOP AQUATIC INVASIVES

HELP PROTECT BIG STONE LAKE AND OTHER LAKES BEFORE LAUNCHING AND BEFORE LEAVING THE LANDING:

- Inspect your boat, trailer and equipment and remove visible aquatic plants, animals and mud.
- Drain water from your boat, motor, jet drive, bilge and live wells.
- Do not move bait used in another lake into the Chain, or from the Chain to another lake.
- Wash your boat and equipment with high pressure, Chain, or from the Chain to another lake.
- Wash your boat and equipment with live wells open for 5 days with hot water and disinfect livewells, bilge and live wells.

STOP AQUATIC INVASIVES

HELP PROTECT THREE LAKES CHAIN AND OTHER LAKES BEFORE LAUNCHING AND BEFORE LEAVING THE LANDING:

- Inspect your boat, trailer and equipment and remove visible aquatic plants, animals and mud.
- Drain water from your boat, motor, jet drive, bilge and live wells.
- Do not move bait used in another lake into the Chain, or from the Chain to another lake.

STOP AQUATIC INVASIVES

HELP PROTECT THREE LAKES CHAIN AND OTHER LAKES BEFORE LAUNCHING AND BEFORE LEAVING THE LANDING:

- Inspect your boat, trailer and equipment and remove visible aquatic plants, animals and mud.
- Drain water from your boat, motor, jet drive, bilge and live wells.
- Do not move bait used in another lake into the Chain, or from the Chain to another lake.
- Wash your boat and equipment with high pressure, or scrub it with hot water and disinfect livewells, or let it dry for five days with live wells open before heading to another waterbody.

Sponsored by the Town of Three Lakes, and the Three Lakes Waterfront Association
