Comments:

Hi Jim -

Per our discussion about the drawdown of Fisher Lake this fall, I'd recommend we follow the recommendations of the Town's application in 1995....Drawdown to begin on Oct. 1st with a target of lowering the water level 4 feet (Elevation of 81.3 down to 77.3), at a rate not to exceed 6 inches per day. The reduced water level should be retained throughout the winter, with refill starting around March 15. Please contact me if you have any questions or concerns.
