Greg & Nancy Thomas
S242 River Road
Arcadia, WI 54612

Dear Mr. and Mrs. Thomas,

The purpose of this letter is acknowledge that by constructing the manure storage structure, closure of your existing storage and writing your nutrient management plan you now comply with a portion of the Wisconsin Non-Point Pollution State Performance Standards in NR 151 Wisconsin Administrative Code. The above practices at your farm located at T 20N, R10W, Sec. 2, NW1/4 of NW ¼ are adequate to meet the following standards:

NR 151.07 Nutrient Management
NR 151.05 (2) Manure Storage Facilities Performance –
New Construction & Alterations
NR 151.05 (3) Manure Storage Facilities Performance –
Closure

In accordance with Ch NR 151, Wisconsin Administrative Code, any practice or facility that is in compliance with a performance standard or prohibition on or after the effective date of the standard or prohibition, must remain in compliance regardless of whether cost sharing is provided to the owner or operator. Since you are now deemed to be in compliance with the performance standards listed above, it is imperative that you and any future owners or operators maintain compliance with them. The Operation and Maintenance Plan that you received from Williams Engineering is your guide to insure continued compliance.

I wish to thank you for working with the county Land Resource Department. If you have any questions, please feel free to give me a call.

Sincerely,

Julie A. Lindstrom
Interim Director
Land Resources Department
