5. Additional Information. (Space will expand to fit your text.)

The Village obtained a Construction Grant from the WDNR for design and construction of a new stormwater quality pond. The purpose of the construction project is to reduce non-point source pollution prior to discharge into the Village's storm sewer system (MS4) and ultimately to Apple Creek, a 303(d) listed waterbody for non-point source pollution. The project will also assist the Village of Little Chute with future NR 216 / WPDES Municipal Permit compliance and NR 151.13 requirements. Specific water quality goals for Ebben Pond and it's 325 acre drainage area included a 63 +/- percent reduction in Total Suspended Solids (TSS).

6. Summary of Project Challenges. (Space will expand to fit your text.)

The prairie seeding was postponed due to settlement of the pond following excavation in during the winter months. Newly placed topsoil contained new weed seeds which needed to be herbicided during the following year (2010).
