B. Project Results Narrative

This was an excellent project, reducing direct runoff from the feedlot to the stream by installing a barnyard runoff system. Also eliminated livestock access to the stream. A SNAPPLUS nutrient management plan was completed by the landowner. He was very interested in knowing what nutrients were being lost and that he will now have to apply to his fields. The landowner is now in compliance with the States Agricultural Performance Standards.

4. Satisfaction of Notice Requirements (if applicable)
