5. Additional Information. (Space will	expand to	fit your text.)
--	-----------	-----------------

This project had several excellent environmental benefits, controlling nutrient and sediment losses from entering Tamarack Creek and the Trempealeau River. A manure storage system, manure storage abandonment, roofed barnyard runoff control system and waterway, along with an updated conservation plan in RUSLE2 and a SNAPPLUS nutrient management plan, have helped this landowner achieve full compliance with the NR151 Performance Standards and Prohibitions. Very willing and cooperative landowners to work with.
