B. Project Results Narrative

Nowak Project was complete with the abandonment of the animal lot and installation of a manure storage that was plumbed and sized to accept milkhouse waste. The landowner installed those practices despite the grant being insufficient to provide 70% cost-sharing. The nutrient management was performed by the landowner with no cost-sharing. The barnyard runoff management was not installed.

Uhl project was complete with the installation of a manure storage that was plumbed and sized to accept milkhouse waste. The landowner installed those practices despite the grant being insufficient to provide 70% cost-sharing. The actual cost-share rate was 31.6%. The barnyard runoff management was not installed.

4. Satisfaction of Notice Requirements (if applicable)
