**3. Summary of Results**

**A. Performance Standards and Prohibitions and Other Water Resources Management Priorities**

For grants issued in calendar year 2006 or later, complete Tables A and B (following) consistent with the entries on your grant application. For grants issued prior to calendar year 2006, complete Tables A and B, *to the best of your knowledge*, consistent with the entries on your grant application.

**Table A. Performance Standards and Prohibitions (per ch. NR 151, Wis. Adm. Code, effective October 1, 2002)**

Performance Standard or Prohibition	Units of Measure	Quantity	Measurement Method Used
Sheet, rill and wind erosion	Acres meeting T		
Manure Storage Facilities: New Construction/Alterations	Number of facilities		
	Number of animal units		
Manure Storage Facilities: Closure	Number of facilities		
Manure Storage Facilities: Failing/Leaking Facilities	Number of facilities		
	Number of animal units		
Clean Water Diversions in WQMA	Pollutant load reduction

**Britt Valley, West Branch Sugar River Project, 2001-TRM #3 Final Report**

The DNR selected the Britt Valley Region of the West Branch Sugar River as a project through the Targeted Resource Management (TRM) Program. The Dane County Land Conservation Department (LCD) received a \$150,000 grant to install conservation practices on the 2-year project.

A local work group comprised of LCD, DNR, landowners and operators, Upper Sugar River Watershed Association (USRWA) and Deer Creek Sportsmen Club (DCSC) developed a management plan in early 2001. Streambank protection and fish habitat restoration were prioritized on the river. The LCD and DNR fish management staff provided the administration and technical support for of the project installation.

The following organization provided in-kind labor and funds to be used as match to the \$150,000.00 TRM grant. DCSC (\$23,168.50), DNR (\$20,000.00), USRWA (\$19,419.00), Madison Fishing Expo (\$2,500.00), Badge Fly Fishers (\$2,500.00), Upper Sugar River Initiative (\$3,733.70), Dane County Conservation League (\$1,500.00). DCSC received a 20-year, 33-foot-wide easement on the project area for public access. Total project cost was \$8.84/foot or \$222,821.20 total.

The construction portion of the project was completed in November 2001. The project was temporarily seeded and will be re-seeded April 2002. Practices installed on five different properties include 6,285 feet of riprap and edging, 15,902 feet of shaping and seeding, 302 fish habitat structures, 3,000 feet of permanent fencing and 20 acres of critical area seeding.

**4. Satisfaction of Notice Requirements (if applicable)**

If cost sharing for this project was offered under a formal notice to achieve compliance with performance standards or prohibitions, provide information for each notice in the table below.
