Subject: FW: GPS Coordinates for Virgin Lake, Oneida County
Attachments: secchi disk location differences.jpg

Hello,
I talked to Eugene Ohm and his monitoring location is the deep hole site to the east of the island (the site that you indicated as the deep hole indicated on map). That is where he has been monitoring for the last 20 years. He just had back surgery so he said this is working out well. He said he is 79 years old and was thinking of retiring so thank you!! He also said that he would be happy to show you the monitoring location if you would like. His phone number is 715-546-2533. He sounds like a wonderful guy. I just wanted to let you know that he seemed happy to hear that there was someone else willing to do the monitoring. He might still take a reading from time to time. He has lived on Virgin Lake all his life.

Jennifer – could you move the location in the SWIMS database?

Thank you to all.
Sandy

Hi ,
The coordinates sent to us as the deep hole on Virgin Lake were
The GPS coordinates are
Latitude 45.78611, Longitude -89.08751

These do not correspond to the position of the deep hole shown on the map given to us with the secchi disk information. Please clarify. I am attaching a pic of the lake with very close positions to show the differences. The above coordinates are given in Degrees where as the coordinates on the map are measured in degrees minutes and seconds to the hundredth of a second.

Please advise as to which to use???

Hello Jennifer,
I am unable to log into SWIMS – could you send the GPS coordinates for the Deep Hole for Virgin Lake in Oneida County to Larry and Lynn Zibell?

Thank you,
Sandy
