Our costs were down slightly due to only 1 person working at the launch at a time and less hours spent at the boat launch.

Gina took over the scheduling during the year to lessen my involvement. We received a grant with 75% funding in order to defer our costs for 2013. For the most part, kids do a good job of interviewing those accessing the lake as it relates to the watercraft inspection report. With the additional "local" questions on our survey sheet (Gina's suggestion), the kids are doing a better job educating the boaters. However, in some cases they have been reluctant to not let cars without trailers from parking at the public launch. Getting new recruits to fill the positions of those who no longer wish to work at the launch has been difficult (1 new employee). We only had a couple shifts of where no one available to work, with a staff of 5 employees; having enough coverage in 2014 may be an issue.

Our data indicates that at over 58% of the people using the public launch go to Lulu Lake. We tried to put more emphasis on removal of weeds when they were leaving our lake. For the most part, boaters were very knowledgeable about the aquatic invasive species laws.

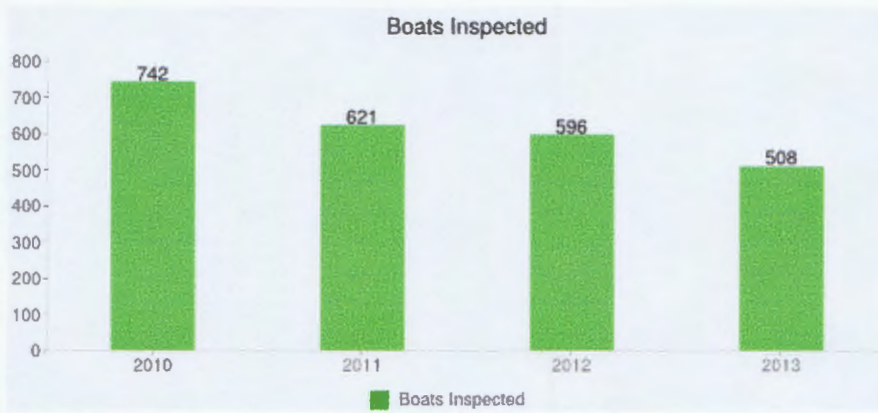

Gina has provided some interesting graphics.

We have graciously received 75% grant funding from the DNR for 2014, and I am recommending this program be continued in 2014 with our continued focus to educate (safety and protection of the environment).

Respectfully submitted,
